

Listing of Claims:

Claim 1. *(Previously Presented)* A powder-dispensing pouch for placement in a fly pocket area of a pair of male underwear, the powder dispensing pouch consisting of:

a top layer of porous material and a bottom layer of porous material;

said top and bottom layers of porous material being joined together by sealed edges extending around the outer perimeters of said top and bottom layers of porous material;

said top and bottom layers of porous material, with their sealed edges, forming a cavity therebetween;

a powder contained within the cavity;

wherein said sealed edges of said powder-dispensing pouch keep the powder between the top layer of a porous material and the bottom layer of porous material, said powder being dispersed through the top layer of a porous material and the bottom layer of porous material and into a male user's groin area when a male user is wearing a pair of underwear with said powder dispensing pouch inserted in a fly pocket area thereof.

Claim 2. *(Cancelled)*

Claim 3. *(Original)* The powder-dispensing pouch according to claim 1, wherein the porous material is linen.

Claim 4. *(Original)* The powder-dispensing pouch according to claim 1, wherein the porous material is a woven fabric.

Claim 5. *(Original)* The powder-dispensing pouch according to claim 1, wherein the porous material is gauze.

Claim 6. *(Original)* The powder-dispensing pouch according to claim 1, wherein the powder is moisture-absorbing powder.

Claim 7. *(Original)* The powder-dispensing pouch according to claim 1, wherein the powder is chafe-reducing powder.

Claim 8. *(Original)* The powder-dispensing pouch according to claim 1, wherein the powder is odor-controlling powder.

Claim 9. *(Original)* The powder-dispensing pouch according to claim 1, wherein the powder is medicated powder.

Claim 10. *(Previously Presented)* A pair of male underwear in combination with a powder-dispensing pouch for placement in a fly pocket area of a pair of male underwear, said combination comprising:

- a pair of male underwear having a fly pocket area;

- a powder dispensing pouch inserted into the fly pocket area of said pair of male underwear, said powder dispensing pouch consisting of:

- a top layer of porous material and a bottom layer of porous material;

- said top and bottom layers of porous material being joined together by sealed edges extending around the outer perimeters of said top and bottom layers of porous material;

- said top and bottom layers of porous material, with their sealed edges, forming a cavity therebetween;

- a powder contained within the cavity; and

wherein said sealed edges of said powder-dispensing pouch keep the powder between the top layer of porous material and the bottom layer of porous material, said powder being dispersed through the top layer of porous material and the bottom layer of porous material and into a male user's groin area when a male user is wearing said pair of underwear with said powder dispensing pouch inserted in the fly pocket area thereof.

Claim 11. *(Previously Presented)* The powder-dispensing pouch according to claim 10, wherein the porous material is linen.

Claim 12. *(Previously Presented)* The powder-dispensing pouch according to claim 10, wherein the porous material is a woven fabric.

Claim 13. *(Previously Presented)* The powder-dispensing pouch according to claim 10, wherein the porous material is gauze.

Claim 14. *(Previously Presented)* The powder-dispensing pouch according to claim 10, wherein the powder is moisture-absorbing powder.

Claim 15. *(Previously Presented)* The powder-dispensing pouch according to claim 10, wherein the powder is chafe-reducing powder.

Claim 16. *(Previously Presented)* The powder-dispensing pouch according to claim 10, wherein the powder is odor-controlling powder.

Claim 17. *(Previously Presented)* The powder-dispensing pouch according to claim 10, wherein the powder is medicated powder.
